THIRTY DAYS · ONE STANDARD

# 16 glassmorphic deliverables, 286 pages, one consistent house style.

The Kincaid iQ Forensic Intelligence Report architecture has produced **13 forensic actuarial defenses** and **3 strategic or thought-leadership pieces** in the trailing thirty days. Every report renders through the same HTML to Playwright Chromium pipeline, anchored to the 757,294-row DOL EFAST2 National Benchmark Index, and verified by the six-agent Verify engine before publish.

The format is now locked as permanent default: Letter format, MECE arc spanning cover, exec snapshot, problem structuring, data ingestion, insight, predictive architecture, scenario map, scenario output, risk lens, control levers, executive synthesis, strategic roadmap, principals, and final verdict. Vibrant gradient backgrounds, glass cards with backdrop blur, gradient text in cyan, pink, and amber, stylized SVG portraits, Goldman plus McKinsey senior partner voice throughout. No em dashes anywhere in any deliverable.
