

INSTITUTIONAL ENGAGEMENT • A PRE-ACQUISITION BENEFITS DILIGENCE ENGAGEMENT

M&A Benefits Diligence Study

A Pre-Acquisition Benefits Diligence Engagement

OVERALL 60/100 • PROCEED WITH CONDITIONS

PREPARED BY KINCAID HEALTH STRATEGIC ADVISORY • A PRE-ACQUISITION BENEFITS DILIGENCE ENGAGEMENT PANEL

Target: MARSH & MCLENNAN COMPANIES. INC. • EIN 362668272 • NEW YORK, NY

20,222 participants • 20 filed plan(s) • sector Professional Services

Computed live from filed DOL Form 5500 data. Gate scores and liability figures are MODELED
heuristics over the filed record (bounds disclosed); no number outruns its evidence.

00 · REPORT MAP & EVIDENCE INVENTORY

FILED · FORM 5500

This study is organized as an evidence pyramid: the executive read and the eight diligence gates sit on top of a filed-record appendix base that reproduces, row by row, every peer observation used to position the target. Nothing in the front matter cites a figure that cannot be located in the appendices or in the target's own filed record.

00A · BAYESIAN PRIOR-TO-POSTERIOR EVIDENCE UPDATE

MODELED

Before any evidence is examined, the reference prior on the event **a diligence gate scores below the 60/100 conditions threshold** is Beta(2, 2), a weakly informative prior centered at 50%. This study observed **3 adverse signals out of 7** examined. Conjugate Beta-Binomial updating gives the posterior Beta(5, 6): the evidence moves the probability from 50% to **45%**, with a 90% credible interval of 22% to 70%. This page states, in probability terms, how strongly the gate evidence should shift a neutral deal team before the chapter detail is read.

50%

PRIOR MEAN

45%

POSTERIOR MEAN

22% to 70%

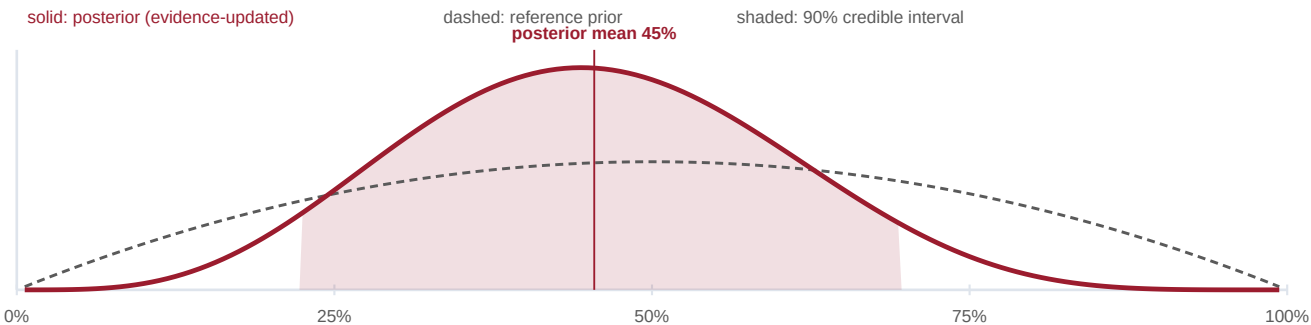

90% CREDIBLE INTERVAL

3 of 7 adverse

EVIDENCE BASE

PRIOR VS POSTERIOR DENSITY OF THE ADVERSE-SIGNAL RATE

MODELED

Evidence register feeding the update (each row is one Bernoulli observation):

Signal examined	Observation	Read
Gate 1 · Stop-Loss Exposure	scored 45/100 vs 60/100 threshold	ADVERSE
Gate 2 · Rx / PBM Contract	scored 58/100 vs 60/100 threshold	ADVERSE
Gate 3 · Fiduciary Process	scored 60/100 vs 60/100 threshold	clears
Gate 4 · Claims & Financial	scored 70/100 vs 60/100 threshold	clears
Gate 5 · TPA / Carrier Stack	scored 72/100 vs 60/100 threshold	clears
Gate 6 · Integration Risk	scored 55/100 vs 60/100 threshold	ADVERSE
Gate 7 · Regulatory Posture	scored 70/100 vs 60/100 threshold	clears

Method honesty: this is a MODELED Bayesian read. Each signal is one equal-weight Bernoulli pseudo-observation and the prior is a disclosed reference prior, not an elicited one. The posterior states how strongly the examined evidence should shift a neutral reader; it is not a claims-grade actuarial probability, and the named ingestions would replace it with a likelihood fitted on real frequencies.

01 · EXECUTIVE SUMMARY & CLOSING RECOMMENDATION

MODELED

60/100

OVERALL SCORE

PROCEED
WITH
CONDITIONS

RECOMMENDATION

\$11,043,921

QUANTIFIED EXPOSURE

20,222

PARTICIPANTS

MARSH & MCLENNAN COMPANIES. INC. (EIN 362668272) operates 20 filed welfare plan(s) covering 20,222 participants at an annual filed benefits cost of \$19,708,653 (PMPM \$81 on the filed participant denominator). Across the eight diligence gates the weighted overall score is **60/100**, which maps to **PROCEED WITH CONDITIONS** under the closing-posture thresholds disclosed in Appendix H. The three modeled exposure lines (stop-loss gap \$9,009,900, recoverable Rx overcharge \$1,245,675, fiduciary process exposure \$788,346) aggregate to **\$11,043,921**, the floor for any escrow holdback or representations-and-warranties insurance limit negotiated in the definitive agreement.

Every gate chapter closes with the document-request list a target must satisfy and the model representations-and-warranties language the exposure supports. Where the filed record cannot carry a conclusion, the finding is labeled INSUFFICIENT_EVIDENCE and the unlocking ingestion is named; narratives never outrun evidence (Hard Rule 04).

Gate	Score /100	Posture	Modeled Exposure
1 · Stop-Loss Exposure	45	HIGH RISK	\$9,009,900
2 · PBM / Rx Contract	58	MODERATE	\$1,245,675
3 · Fiduciary & CAA	60	MODERATE	\$788,346
4 · Claims & Financial	70	MODERATE	-
5 · TPA & Carrier	72	MODERATE	-
6 · Integration Risk	55	MODERATE	-
7 · Regulatory & Litigation	70	MODERATE	-
8 · Deal Structure	60	PROCEED WITH CONDITIONS	\$11,043,921

02 · TARGET PROFILE & FILING IDENTITY

FILED · FORM 5500

Attribute	Filed value
Filed employer name	MARSH & MCLENNAN COMPANIES. INC.
EIN	362668272
Location	NEW YORK, NY
Sector (filed business code)	Professional Services · code 541600
Filed plan count	20
Filing count on record	37
Participants (max filed)	20,222
Annual filed benefits cost	\$19,708,653
Filed total income (latest)	\$0
Filed assets / liabilities (EOY)	\$0 / \$0
Health benefit signal	no
Stop-loss signal	NO (gate 1 exposure applies)
Drug benefit signal	no
Filed carriers (Schedule A)	THE PRUDENTIAL LIFE INSURANCE CO. OF AMERICA, VISION SERVICE PLAN, METROPOLITAN LIFE INSURANCE COMPANY
SEC EDGAR	no 10-K match (treated as private)

Identity resolution: the EIN was resolved from the group-name search against the filed employer universe (191,887 employers with welfare filings, 2020–2024). All appendix cohorts key off this EIN's filed business code, state, and participant count.

03 · QUANTIFIED EXPOSURE REGISTER

MODELED

Exposure line	Basis	Modeled amount	Unlocking ingestion
Stop-loss gap	\$450 × participants above 200-life floor (absent coverage signal)	\$9,009,900	Executed stop-loss policy + large-claim report
Rx overcharge (recoverable)	\$280 PMPY waste midpoint × 22% recoverability	\$1,245,675	PBM contract + 24-mo Rx claims + rebate remittances
Fiduciary process exposure	4% of filed annual plan cost (settlement midpoint)	\$788,346	Committee minutes + 408(b)(2) file + RFP cadence
Total quantified	Sum of modeled lines (escrow / R&W floor)	\$11,043,921	-

Every line is MODELED: the bases are disclosed midpoints applied to filed denominators, not reconciled claim records. A figure moves to CERTIFIED only when contract clause + claim record + remittance reconcile (tier doctrine, Appendix H). Deal teams should treat the register as the opening position for escrow sizing, not as a damages calculation.

04 · GATE 1 · STOP-LOSS EXPOSURE ASSESSMENT

MODELED

45/100

GATE SCORE

HIGH RISK

POSTURE

\$9,009,900

MODELED EXPOSURE

MODELED

EVIDENCE TIER

Methodology. Filed welfare benefit codes and Schedule A carrier records are scanned for stop-loss coverage signals. Where no signal exists on an employer above 200 participants, the gap exposure is modeled at \$450 per participant above the 200-life retention floor, the midpoint of published specific-deductible pricing for unprotected self-funded groups. The score is a deterministic heuristic over the filed posture, not an underwriting opinion.

Findings.

- No stop-loss coverage signal detected in any filed year: the population is self-insured with no catastrophic reinsurance evidenced. Modeled gap exposure: \$9,009,900.
- Estimated MLR of 0% sits inside the customary 82–88% self-funded corridor.
- Population exceeds 1,000 lives: aggregate corridor analysis and a 3-year large-claim history are required before pricing the retention.
- Laser audit: confirm whether any claimant has been lasered out of coverage at renewal; lasers transfer catastrophic risk back to the plan silently.

Diligence document requests.

#	Request
1	Executed specific & aggregate stop-loss policy (current + 2 prior years)
2	Large-claim report: all claimants above 50% of specific deductible, 36 months
3	Renewal exhibits including laser schedule and disclosure statements
4	A.M. Best rating confirmation for the issuing carrier

Model R&W / covenant language. Seller represents that (i) the stop-loss policy identified in the disclosure schedules is in full force and effect and will remain bound through Closing; (ii) no claimant has been excluded, lasered, or separately rated except as disclosed; and (iii) no carrier has issued notice of non-renewal, rescission, or reservation of rights.

05 · GATE 2 · PBM & RX CONTRACT INTELLIGENCE

MODELED

58/100

GATE SCORE

MODERATE

POSTURE

\$1,245,675

MODELED EXPOSURE

MODELED

EVIDENCE TIER

Methodology. Filed drug-benefit signals establish whether a pharmacy benefit exists; the overcharge estimate applies the published \$280 per-member annual Rx-waste midpoint at a 22% recoverability factor to the filed participant count. Line-level Rx premium is not filed on the Form 5500, so every Rx dollar figure is MODELED until a PBM contract and claims extract are ingested.

Findings.

- Modeled recoverable Rx overcharge for 20,222 participants: \$1,245,675 annually (22% of the \$280 PMPY waste midpoint).
- Spread-pricing risk: non-pass-through contracts routinely retain the difference between plan charge and pharmacy reimbursement; the filed data cannot rule this in or out; contract language controls.
- Rebate pass-through language must be verified; plans without 100% pass-through lose an estimated \$50–150 per member per year in retained manufacturer value.
- GLP-1 formulary exposure requires a specific assessment; covered populations add \$200–800 PMPM at current list prices.
- CAA gag-clause attestation must be on file with CMS; absence is a direct compliance finding.

Diligence document requests.

#	Request
1	Executed PBM agreement including all amendments, exhibits, and rate schedules
2	24 months of Rx claims detail with ingredient cost, fees, and rebate fields
3	Rebate remittance statements (all channels) for the trailing 8 quarters
4	Gag Clause Prohibition Compliance Attestation submission confirmation

Model R&W / covenant language. Seller represents that all PBM compensation, in whatever form (spread, rebate retention, administrative fees, data fees), has been disclosed, and grants Buyer a post-closing audit right over the PBM agreement exercisable within 24 months, with recoveries flowing to the plan.

06 · GATE 3 · FIDUCIARY & CAA COMPLIANCE

MODELED

60/100

GATE SCORE

MODERATE

POSTURE

\$788,346

MODELED EXPOSURE

MODELED

EVIDENCE TIER

Methodology. Fiduciary exposure is modeled at 4% of annual filed plan cost (or \$450 per participant where no cost is filed), the midpoint of published ERISA settlement ranges for process failures. The score is held at the structural baseline because governance artifacts (committee minutes, 408(b)(2) files, RFP cadence) are not observable in public filings: they must be produced in diligence.

Findings.

- Modeled fiduciary process exposure: \$788,346. ERISA §404(a) requires documented prudent process for every vendor selection and fee decision.
- Gag Clause Attestation (CAA §201): verify annual submission to CMS for every filed year since 2023; non-attestation is an automatic DOL inquiry trigger.
- Fee reasonableness: admin fees must be benchmarked against the state and national percentile tables in Appendices D–F; sustained placement above P75 without documented rationale is the fact pattern behind current excessive-fee litigation.
- MHPAEA comparative analysis must exist in writing; enforcement activity is rising and successor liability attaches at closing.
- Committee governance: request charters, minutes, and the most recent vendor RFP file.

Diligence document requests.

#	Request
1	Benefits committee charter, membership roster, and 24 months of minutes
2	All §408(b)(2) fee disclosures received from covered service providers
3	MHPAEA NQTL comparative analysis (written)
4	Gag-clause attestation confirmations; most recent broker/consultant RFP file

Model R&W / covenant language. Seller represents that each plan has been administered in material compliance with ERISA and the Code; that all required attestations, disclosures, and comparative analyses have been timely made; and that no fiduciary process claim is pending or threatened. Survival: not less than three (3) years.

07 · GATE 4 · CLAIMS & FINANCIAL PERFORMANCE

MODELED

70/100

GATE SCORE

MODERATE

POSTURE

MODELED

EVIDENCE TIER

Methodology. Filed Schedule H income and premium totals drive the PMPM and estimated-MLR reads. PMPM is computed on the filed participant denominator (participants, not members; the filed count is the only denominator the 5500 provides). A members census upload re-scales the denominator and would demote these reads to MODELED under the tier doctrine.

Findings.

- Annual filed benefits cost: \$19,708,653; PMPM \$81 on the filed participant denominator vs the ~\$750 self-funded median.
- Estimated MLR 0% is inside the manageable corridor (benchmark 82–88%).
- Trend validation: request 36 months of paid-claims triangles; the national self-funded trend is 6–8%; anything above 10% needs a causal decomposition before close.
- Peer placement: Appendices A–C position every filed dollar of this plan against its sector, state, and size-band cohorts row by row.
- Multiple active plans filed; consolidation complexity adds integration cost and employee disruption risk (see Gate 6).

Diligence document requests.

#	Request
1	36 months paid-claims triangles (medical + Rx separately)
2	Monthly enrollment by tier for the same window
3	High-cost claimant report with prognosis codes (de-identified)
4	Current stop-loss and admin invoices reconciled to the general ledger

Model R&W / covenant language. Seller represents that the claims, enrollment, and financial exhibits delivered in diligence are complete and accurate in all material respects, and that no adverse claims development or known high-cost condition has been omitted from the disclosed large-claim report.

08 · GATE 5 · TPA & CARRIER ASSESSMENT

MODELED

72/100

GATE SCORE

MODERATE

POSTURE

MODELED

EVIDENCE TIER

Methodology. Third-party administration quality is not observable in the public filing beyond carrier identity and fee totals; the structural baseline score reflects that evidentiary limit. Filed admin fees are benchmarked in Appendices D–F; contract terms must be produced.

Findings.

- Filed carriers on record: THE PRUDENTIAL LIFE INSURANCE CO. OF AMERICA, VISION SERVICE PLAN, METROPOLITAN LIFE INSURANCE COMPANY.
- Verify performance guarantees, SLA minimums, and termination rights in the ASA; change-of-control clauses frequently trigger automatic termination at closing.
- Claims accuracy: industry standard is 98%+ financial accuracy; request the two most recent audited performance reports.
- Network adequacy must be validated against post-acquisition geography; workforce moves create silent access gaps.
- Carrier strength: confirm A.M. Best A- or better for every risk-bearing counterparty.

Diligence document requests.

#	Request
1	Executed ASA/TPA agreement with all amendments and performance guarantees
2	Two most recent claims-accuracy / performance-guarantee audit reports
3	Network disruption analysis for the combined footprint
4	Carrier financial-strength confirmations (A.M. Best)

Model R&W / covenant language. Seller represents that all administrative services agreements are in full force, that no counterparty has asserted breach or served notice of termination, and that no change-of-control provision will be triggered by the transaction except as disclosed.

09 · GATE 6 · M&A INTEGRATION RISK

MODELED

55/100

GATE SCORE

MODERATE

POSTURE

MODELED

EVIDENCE TIER

Methodology. Integration complexity is scored from the filed plan count and filing cadence: multiple concurrent plans mean multiple TPA, PBM, and carrier contracts to consolidate, each with its own termination mechanics. The score is a planning heuristic, not a project plan.

Findings.

- 20 active plan filings on record; each carries its own vendor stack; modeled consolidation timeline 12–18 months.
- COBRA: every qualifying event triggered by the transaction (layoffs, restructuring) creates successor COBRA exposure; cap it in the purchase agreement.
- Change-of-control: PBM and TPA agreements frequently allow termination or repricing on closing; inventory every such clause before signing.
- Harmonization: if the acquirer's design is leaner, the richer plan must generally run through the next open enrollment; price that bridge cost.
- Day-1 readiness: benefits integration planning starts at LOI, not at close.

Diligence document requests.

#	Request
1	Full vendor contract inventory with change-of-control and termination grids
2	Census with hire dates, tiers, and COBRA-eligible population
3	Open-enrollment calendar and plan-design summaries (both parties)
4	TSA requirements list for benefits administration, if any

Model R&W / covenant language. Seller covenants to maintain each plan in the ordinary course through Closing, to make no amendment increasing cost or liability without Buyer consent, and to cooperate in obtaining every vendor consent required by a change-of-control provision.

10 · GATE 7 · REGULATORY & LITIGATION EXPOSURE

MODELED

70/100

GATE SCORE

MODERATE

POSTURE

MODELED

EVIDENCE TIER

Methodology. The filed record is scanned for cadence gaps (late or missing 5500s indicate governance drift and DOL audit risk). The federal-database sweep rendered on screen (8 sources) is referenced here; its live results are not embedded so that this document never outruns the evidence available at generation time.

Findings.

- Form 5500 cadence: 37 filings on record across 3 observed years; gaps or late filings are direct DOL audit flags.
- ERISA class-action screen: excessive-fee and opaque-PBM fact patterns are the two dominant plaintiff theories; Appendices D–F provide the percentile evidence either way.
- ACA: verify 1094/1095-C filings and affordability safe-harbor elections for all filed years.
- State mandates: confirm compliance in every operating jurisdiction of the combined entity.
- Request disclosure of every DOL/IRS/PBGC inquiry, audit, or VCP filing in the last 6 years.

Diligence document requests.

#	Request
1	Copies of the three most recent Form 5500 filings with schedules and auditor's opinions
2	All correspondence with DOL, IRS, or PBGC in the trailing 6 years
3	1094-C/1095-C filing confirmations for the trailing 3 years
4	Litigation hold list and EPLI/fiduciary liability policy declarations

Model R&W / covenant language. Seller represents that no governmental investigation, audit, or proceeding relating to any plan is pending or threatened; that all filings have been timely made; and agrees to a special indemnity for pre-closing regulatory liabilities surviving not less than the applicable statute of limitations.

11 · GATE 8 · DEAL STRUCTURE RECOMMENDATIONS

MODELED

60/100

GATE SCORE

MODERATE

POSTURE

MODELED

EVIDENCE TIER

Methodology. The closing recommendation aggregates the seven evidence gates into the weighted overall score (weights disclosed in the Methodology appendix) and maps it onto three institutional postures: PROCEED (70 or above), PROCEED WITH CONDITIONS (50–69), FLAG FOR RENEGOTIATION (<50).

Findings.

- Overall plan risk score: 60/100, mapping to PROCEED WITH CONDITIONS.
- Quantified benefit-plan exposure: \$11,043,921, the recommended escrow holdback or R&W insurance limit floor.
- CRITICAL: stop-loss coverage must be bound as a closing condition; absent it the acquirer assumes unprotected catastrophic risk at the closing timestamp.
- Independent PBM audit as a closing condition; recoverable overcharges are frequently material to deal economics and revert to the buyer post-close.
- Require a 90-day benefits transition plan from target management before LOI execution.

Diligence document requests.

#	Request
1	Escrow/holdback term sheet sized to the quantified exposure register
2	R&W insurance quote with ERISA/benefits endorsement
3	Closing-condition checklist (stop-loss binder, PBM audit right, attestation evidence)
4	Post-close 90-day integration plan with owner assignments

Model R&W / covenant language. The definitive agreement should carry: (i) an escrow holdback not less than the quantified exposure herein; (ii) ERISA representations surviving not less than three (3) years; (iii) a PBM audit right with plan-level recovery; and (iv) closing conditions covering stop-loss binding and compliance attestation evidence.

APPENDIX A · IN-STATE SECTOR PEER COHORT · PROFESSIONAL SERVICES · NY

FILED · FORM 5500

Every filed employer in the target's sector and state, ordered by participant count. This is the cohort a plaintiff's expert or a DOL examiner would draw first; the target's fee posture must be defensible row by row against it. **1,400 filed employers.**

APPENDIX C · SIZE-BAND PEER COHORT · 10,111–40,444 PARTICIPANTS

FILED · FORM 5500

Cross-sector employers within 0.5×–2× of the target's filed participant count, ordered by welfare premium volume. Size, not sector, is the dominant driver of admin-fee and commission percentiles; this cohort isolates that effect. **1,443 filed employers.**

APPENDIX H · METHODOLOGY, TIER DOCTRINE, GLOSSARY & LIMITATIONS

DOCTRINE

Score weights. Overall = Stop-Loss 20% + Rx/PBM 16% + Fiduciary 18% + Claims & Financial 16% + TPA/Carrier 10% + Integration 10% + Regulatory 10%. Closing posture: PROCEED at 70 or above · PROCEED WITH CONDITIONS 50–69 · FLAG FOR RENEGOTIATION <50.

Formula	Definition
PMPM	Filed annual expense ÷ (filed participants × 12); participant, not member, denominator
Est. MLR	Filed expense ÷ filed income × 100, an estimate, not a reconciled loss ratio
Stop-loss gap	\$450 × max(0, participants - 200) where no coverage signal is filed
Rx overcharge	participants × \$280 PMPY × 22% recoverability
Fiduciary exposure	4% × filed annual expense (or \$450 × participants absent expense)

Confidence tiers (exactly three). CERTIFIED: contract clause + claim record + remittance, reconciled. MODELED: inference from incomplete evidence, bounds disclosed. INSUFFICIENT_EVIDENCE: no finding issued; the unlocking ingestion is named. Gate scores in this study are MODELED; filed tables are labeled FILED · FORM 5500 and carry filed-record provenance.

Data base. DOL Form 5500 filings 2020–2024 (936,865 Schedule H plan-years; 191,887 employers; 1.35M Schedule A records), SEC EDGAR 10-K identity matches. Line-level Rx premium, claim-level pricing, and rebate remittances are NOT filed on the Form 5500; every dollar figure derived from them is MODELED by construction.

Limitations. This study is decision support for transaction diligence, not legal advice, tax advice, or actuarial certification. Liability estimates apply disclosed midpoints to filed denominators and do not reflect actual plan experience. Acquirer's ERISA counsel must independently verify all material findings. No portion of this study may be disclosed to the target or any third party without prior written consent.
